

iAccessible (powered by Revelo Software) accepted into GSA IAAF

Revelo's accessibility testing, analytics and reporting platform, **iAccessible**, has been accepted to be featured at the 2020 Interagency Accessibility Forum! The event takes place October 6 & 7.

The 2020 Interagency Accessibility Forum with the theme “Enabling Missions through Accessible Technology - Leaving No One Behind” celebrates the 75th observance of National Disability Employment Awareness Month (NDEAM), and the 30th anniversary of the Americans with Disabilities Act (ADA).

iAccessible is an end-to-end accessibility and usability platform. It provides real-time pricing, automated scans, deadline scans, dashboards, stratified statistical sampling for manual testing, integration with Google Analytics, and customized reporting for executives, managers and developers. iAccessible is powered by Revelo Software. Revelo is used by Federal agencies for program and enterprise data collection, data preparation, analysis and customized reporting (www.ReveloSoftware.com).
