

Pilot Release Notes: **iAccessible Version 1.101.0.128**

14 August 2020
Time 2 PM. - USA

Release Notes

1.101.0.128

- Links in the Accessibility Monitor dashboard that direct user from the iAccessible application now open in a new tab so that user does not lose their place in the application.
- Password security standards have been updated to better secure user accounts.
- Many accounts were seeing Marks_Account as an organization options for dashboards. This has been resolved.
- Under manage subscriptions, header text was being cut short due to column length. A tool tip has now been provided to help mobility and hearing-impaired users better engage the dashboard.
- Manage subscription pages test now fits within the limits of the background.
- Free scan report UI updates.
- Updated formatting on Forgot email password to better fit industry standards.
- Multiple UI updates on Accessibility Monitor dashboard.
- Eliminated user's ability to select an organization in the dashboards that does not have associated accessibility data, eliminating unnecessary loading screens that do not populate dashboards.
- [Free scan page](#) now verifies email and webpage datatypes before submission

Coming Soon

- Targeted risk analysis using Google Analytics.
- New dashboards strategizing presence of features.
- Document recognition and accessibility evaluation and remediation.
- PDF readability and webpage readability scores.
- Improved Dashboard Performance.
